Official Press Release:
December 29, 2005

OSD facing landmark annual results; New 2006 growth forecasts.

Khaled R. Khuda, President and CEO of OSD, announced today that results from 2005 were stronger than expectation. OSD is pleased to announce to its investors a strong 2005 return, and strategic growth plan for 2006. The annual results in 2005 have OSD showing major growth in industries of home appliances, military, medical, test and measurement, security and ID, and various consumer applications. web-based traffic is up 50% to 100% increase over 2004, OSD has doubled USA personnel, and made significant investment to operations in North America. Shipments in 2005 were strong including design wins with Tier 1 manufacturers for information security products using the featured Samsung 96xRGBx96 OLED display. OSD has also created a surge of sales and shipments on the new OSDC150-262k-CON a large 1.5" color OLED panel featuring improved brightness, interface, and image quality. Sales representation in global markets has also been expanded for local presence and communication.

2006 will take a new growth policy as office locations are being expanded to support additional personnel, space for global logistics, and for added infrastructure.

"Our new product roadmap will continue to advance our product line into new and emerging markets, and stimulate expanded operations as larger organic panels are produced. The larger panels will allow greater productivity with our existing customers.", said Thomas Haney North American Regional Sales Manager.

Engineers presenting end-of-year results and forward looking materials on new products for 2006 are excited about additional market penetration. New full color OLED designs from OSD are anticipated in 1H 2006. These displays will enter new applications, and allow OLED technology to replacing similar LCD display technologies within the industry. Cellular phones using OLED sub-display panels will now allow main displays + sub-display panel combinations. This innovation will eliminate significant thickness, power consumption, and development efforts. New products are also being designed to improve lifetime, viewing performance, and system connectivity.

"Our productivity was given additional stimulus in 2005 via R&D results. Expanded reliability for industrial applications, new innovative product interfaces, and the linear growth of product offerings have provided us the resources to effectively produce global sales. OSD has become a leader in the expanding global OLED marketplace".

About OSD

One Stop Displays ("OSD") is an exclusive company featuring advanced display technology. OSD was founded by Mr. Khaled Khuda. OSD is closely aligned with Universal EMS for value added display designs, board assembly, and full OEM turnkey solutions. All advertisements on products and services are established under the label OSD. OSD has also reserved the internet domain <http://www.onestopdisplays.net> which extends the OSD customer-oriented approach to business globally. OSD has instituted press releases for the sole purpose of public announcements reflecting its development, growth, and openly identifying its business direction to OSD customers.

About CEO Khaled R. Khuda:

Khaled R. Khuda, a nationally prominent LCD display expert and entrepreneur, earlier this year sold a majority equity interest in Data International of North America, LLC ("DINA"). DINA is an LCD display

sales company founded by Mr. Khuda thirteen years ago. [DINA also sold certain of its assets.] The purchaser of such equity and assets is a Taiwan manufacturer and minority owner of DINA called Data International, Ltd. ("Data Taiwan"). Data Taiwan manufactured most of the parts sold by DINA. Data Taiwan later resold such DINA assets to and entered into a licensing and supply arrangement with TFS-DI, Inc., a subsidiary of Three-Five Systems, Inc. Three-Five is a publicly traded company operating out of Tempe, Arizona. Mr. Khuda's success in the display industry has led him to a new focusing on the latest technologies and a broad range of other products and services.
